**Spencerport Family EyeCare**  
Located inside Spencerport Optical  
24 West Ave.  
Spencerport, NY 14559  
352-1960

## RETINAL DIGITAL PHOTOGRAPHY

A new, highly sophisticated, computerized camera now enables us to provide a more thorough analysis of your eyes. Retinal photography can assist us in documentation of retinal problems, optic nerve disease, precancerous lesions, macular degeneration, hypertensive retinopathy, diabetic retinopathy, etc.

Photo-documentation is painless since nothing will touch your eye. The specialized digital picture can be an excellent reference point from which your doctor can make future comparisons for years to come.

We encourage all of our patients to have retinal photographs taken. It is especially important for all people over the age of 35 as well as for those patients who have a history of high blood pressure, **diabetes**, retinal problems, headaches, floaters, flashing lightstreaks, or a strong prescription for glasses.

**There is an additional charge of \$30.00 (includes both eyes). Please check the appropriate box and sign the bottom.**

- I want the retinal photography.
- I **do not** want the retinal photography.
- I want to discuss it with the Dr. first.

While retinal photography for documentation purposes represents preventive health care for some, for others, retinal photography is required to monitor or rule out certain eye conditions. In this latter case, when eye disease is present, the fee for the retinal photography may be reimbursable from your insurance company. All photography payments are eligible for **Flex spending**.
